Forward-Looking Statements

This presentation contains forward-looking statements based on the beliefs of the company, as well as assumptions made by, and information currently available to our management team. When used in this presentation, words such as “anticipate,” “project,” “expect,” “plan,” “seek,” “goal,” “estimate,” “forecast,” “intend,” “could,” “should,” “will,” “believe,” “may,” “potential” and similar expressions and statements regarding our plans and objectives for future operations, are intended to identify forward-looking statements.

Although management believes that the expectations reflected in such forward-looking statements are reasonable, it can give no assurance that such expectations will prove to be correct. You should not put undue reliance on any forward-looking statements, which speak only as of their dates. Forward-looking statements are subject to risks and uncertainties that may cause actual results to differ materially from those expected, including insufficient cash from operations, adverse market conditions, governmental regulations, the possibility that tax or other costs or difficulties related thereto will be greater than expected, the impact of competition and other risk factors discussed in our latest filings with the Securities and Exchange Commission.

All forward-looking statements attributable to Enterprise or any person acting on our behalf are expressly qualified in their entirety by the cautionary statements contained herein, in such filings and in our future periodic reports filed with the Securities and Exchange Commission. Except as required by law, we do not intend to update or revise our forward-looking statements, whether as a result of new information, future events or otherwise.

Key Investment Considerations

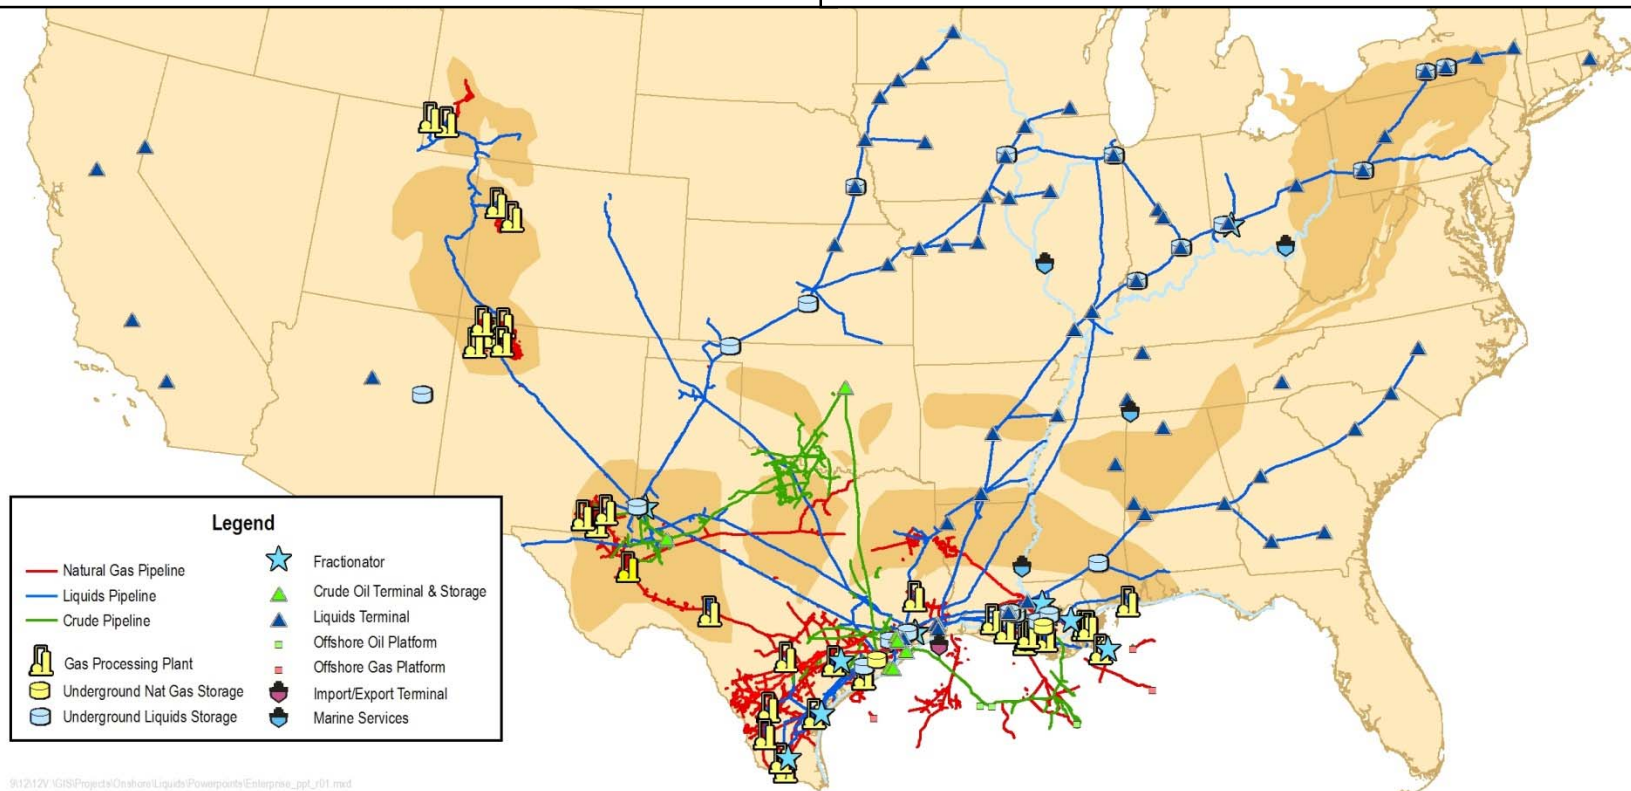

- Largest publicly traded energy partnership with an enterprise value of approximately \$62 billion
 - 62nd on Fortune 500; 226th on Fortune Global 500
- Integrated midstream energy infrastructure serving producers and consumers of natural gas, NGLs, crude oil, petrochemicals and refined products
 - Transport over 4 million BPD of NGLs, crude oil, refined products and petrochemicals and 14 Bcf/d of natural gas
 - Access to major natural gas / NGL / crude oil supply basins in the U.S.
 - Pipelines connected to every U.S. ethylene steam cracker (largest consumer of NGLs) and ≈95% of refining capacity east of the Rockies
- Diversified businesses and sources of cash flow
- \$7.7 billion of growth projects under construction
- Investor-friendly structure – no GP IDRs – lower cost of capital

EPD Portfolio of Integrated Assets

Major Asset Overview

- 50,700 miles of natural gas, NGL, crude oil, refined products and petrochemical pipelines
- 190 MMBbls of NGL, refined products and crude oil, and 14 Bcf of natural gas storage capacity
- 25 natural gas processing plants
- 21 NGL & Propylene fractionators
- 6 offshore hub platforms
- NGL import / export terminals
- Butane isomerization complex; octane enhancement facility; high-purity isobutylene facility

Geographic and Business Diversification Provide Multiple Earnings Streams

\$4.3 Billion Gross Operating Margin
For 12 months ended September 30, 2012

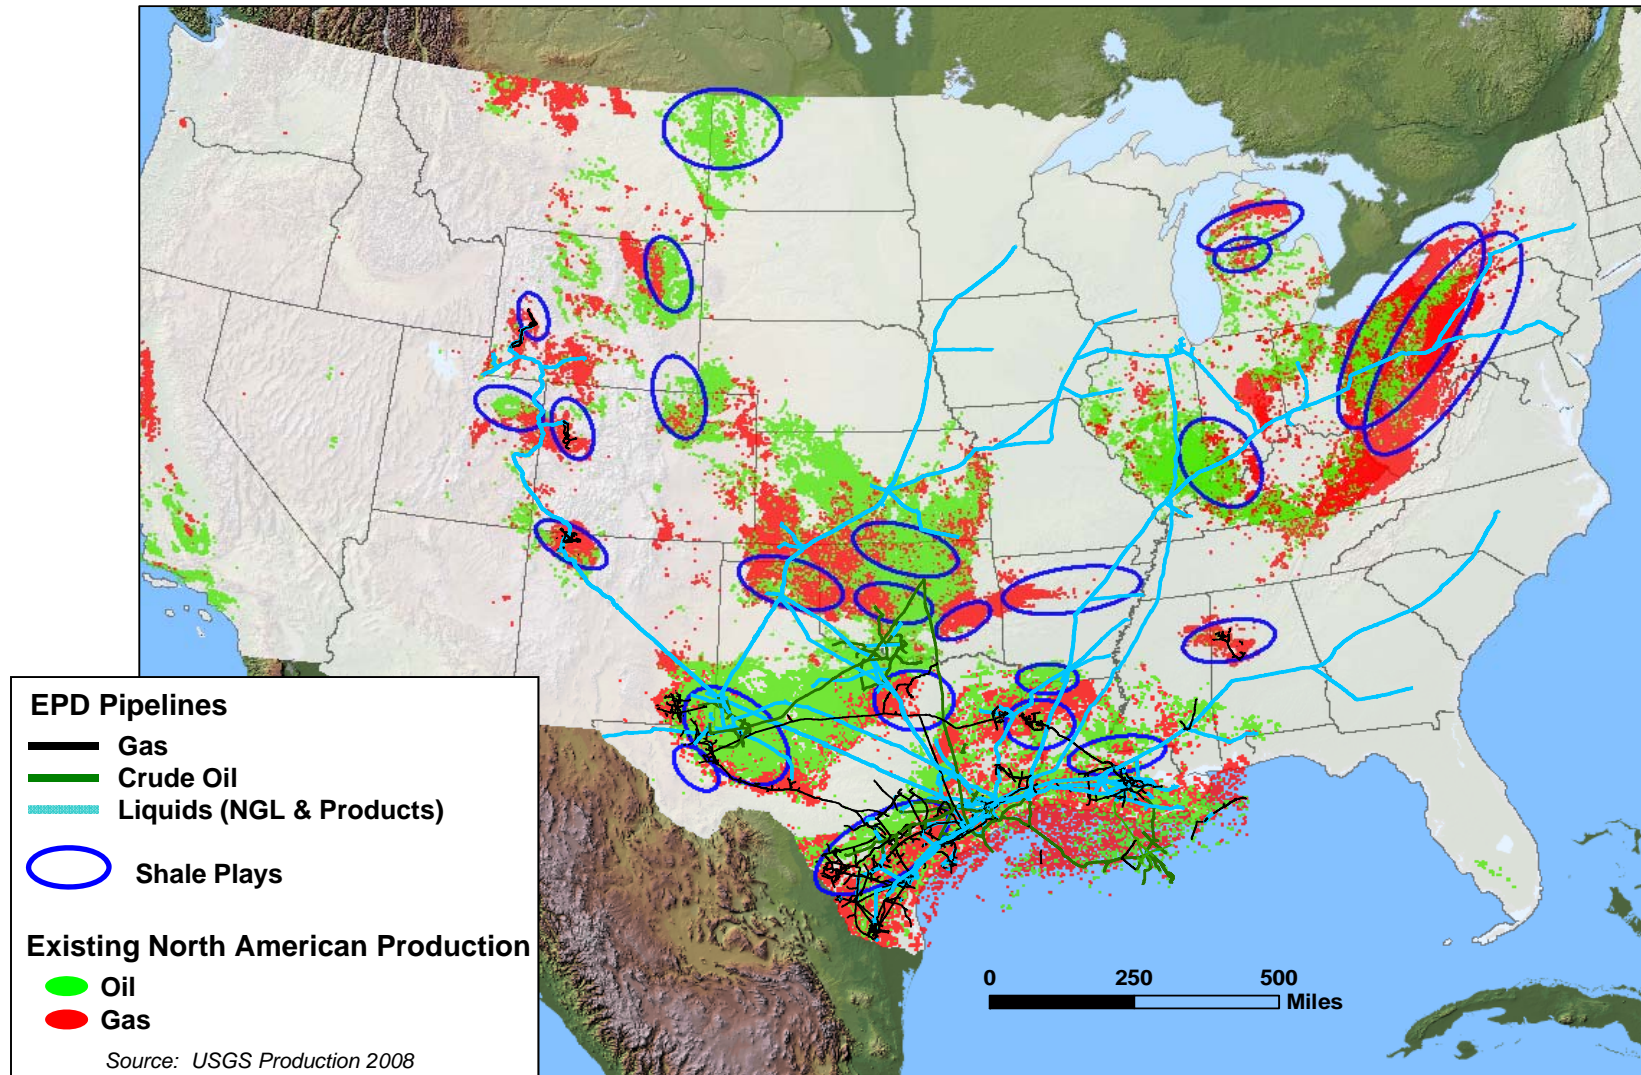

- **NGL Pipelines & Services (57%)**
 - Natural gas processing & related NGL marketing activities
 - NGL fractionation plants
 - NGL import / export terminals
 - NGL pipelines and storage
- **Onshore Natural Gas Pipelines & Services (18%)**
 - Natural gas pipelines & related marketing activities
 - Natural gas storage facilities
- **Petrochemical & Refined Products Services (13%)**
 - Refined products and petrochemical pipelines
 - Butane isomerization facilities
 - Propylene fractionation facilities
 - Octane enhancement and high-purity isobutylene facilities
 - Marine terminals & transportation
 - Related marketing activities
- **Onshore Crude Oil Pipelines & Services (7%)**
 - Crude oil pipelines, storage terminals & related marketing activities
- **Offshore Pipelines & Services (5%)**
 - Natural gas pipelines
 - Crude oil pipelines
 - Platform services

Existing Wells and Shale Plays

It's No Coincidence

Shale Plays: Long-Term Future Development Potential

Play	Estimated Acres	Remaining Locations	Wells per Year	Potential Years of Drilling
Marcellus	15,000,000	175,000	1,650	100
Utica	13,000,000	50,000	600	80
Eagle Ford	10,000,000	100,000	2,500	40
Mississippian	6,500,000+	30,000+	600	50
Barnett	4,000,000	30,000 (<i>>19,000 drilled</i>)	1,000	30
Haynesville / Bossier	3,500,000	50,000	1,000	50

- Hydrocarbons from shale rocks are the source for conventional oil and gas
- We have known about shales and their potential for years but could not extract their oil and gas in economic quantities
- Horizontal drilling and fracking techniques now enable hydrocarbon recovery from the natural fractures found in shales

Major EPD Growth Projects

Shale Plays Drive EPD's Western NGL Pipeline Expansions: ≈\$1.0 Billion

● MAPL Rocky Mountain NGL Pipeline Expansion

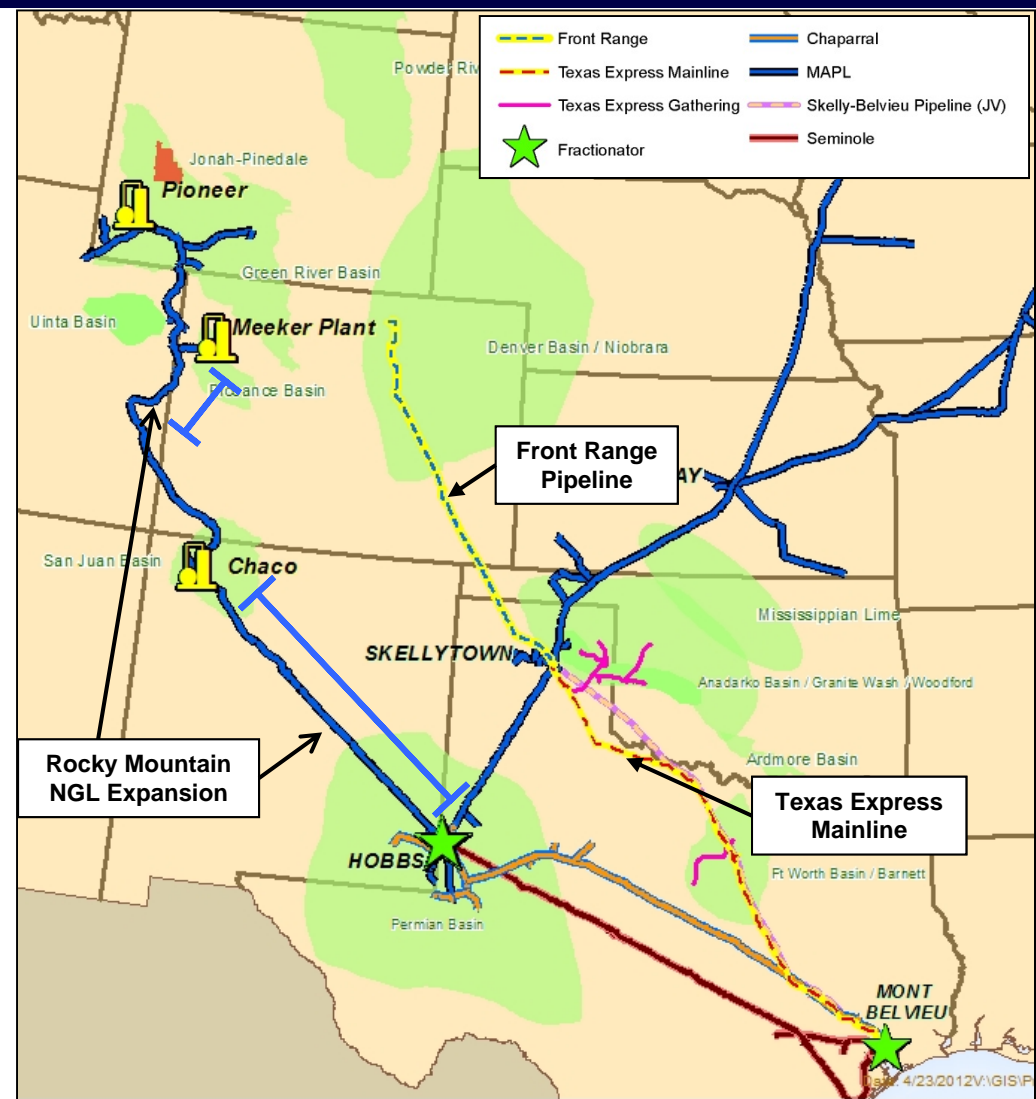

- 218 miles of 16" pipeline loops and 18 pump modifications to increase capacity from 275 MBPD to ≈340 MBPD
- 10-year, ship-or-pay agreements
- Expected in-service: 1Q 2014

● Texas Express NGL Pipeline

- EPD (35%), Enbridge Energy Partners (EEP – 35%), Anadarko (APC – 20%) and DCP (10%)
- EPD to construct / operate 580 miles of 20" pipe from Skellytown to Mont Belvieu
- 10-year, ship-or-pay agreements
- Capacity of 250 MBPD expandable to 400 MBPD; expected in-service: 2Q 2013

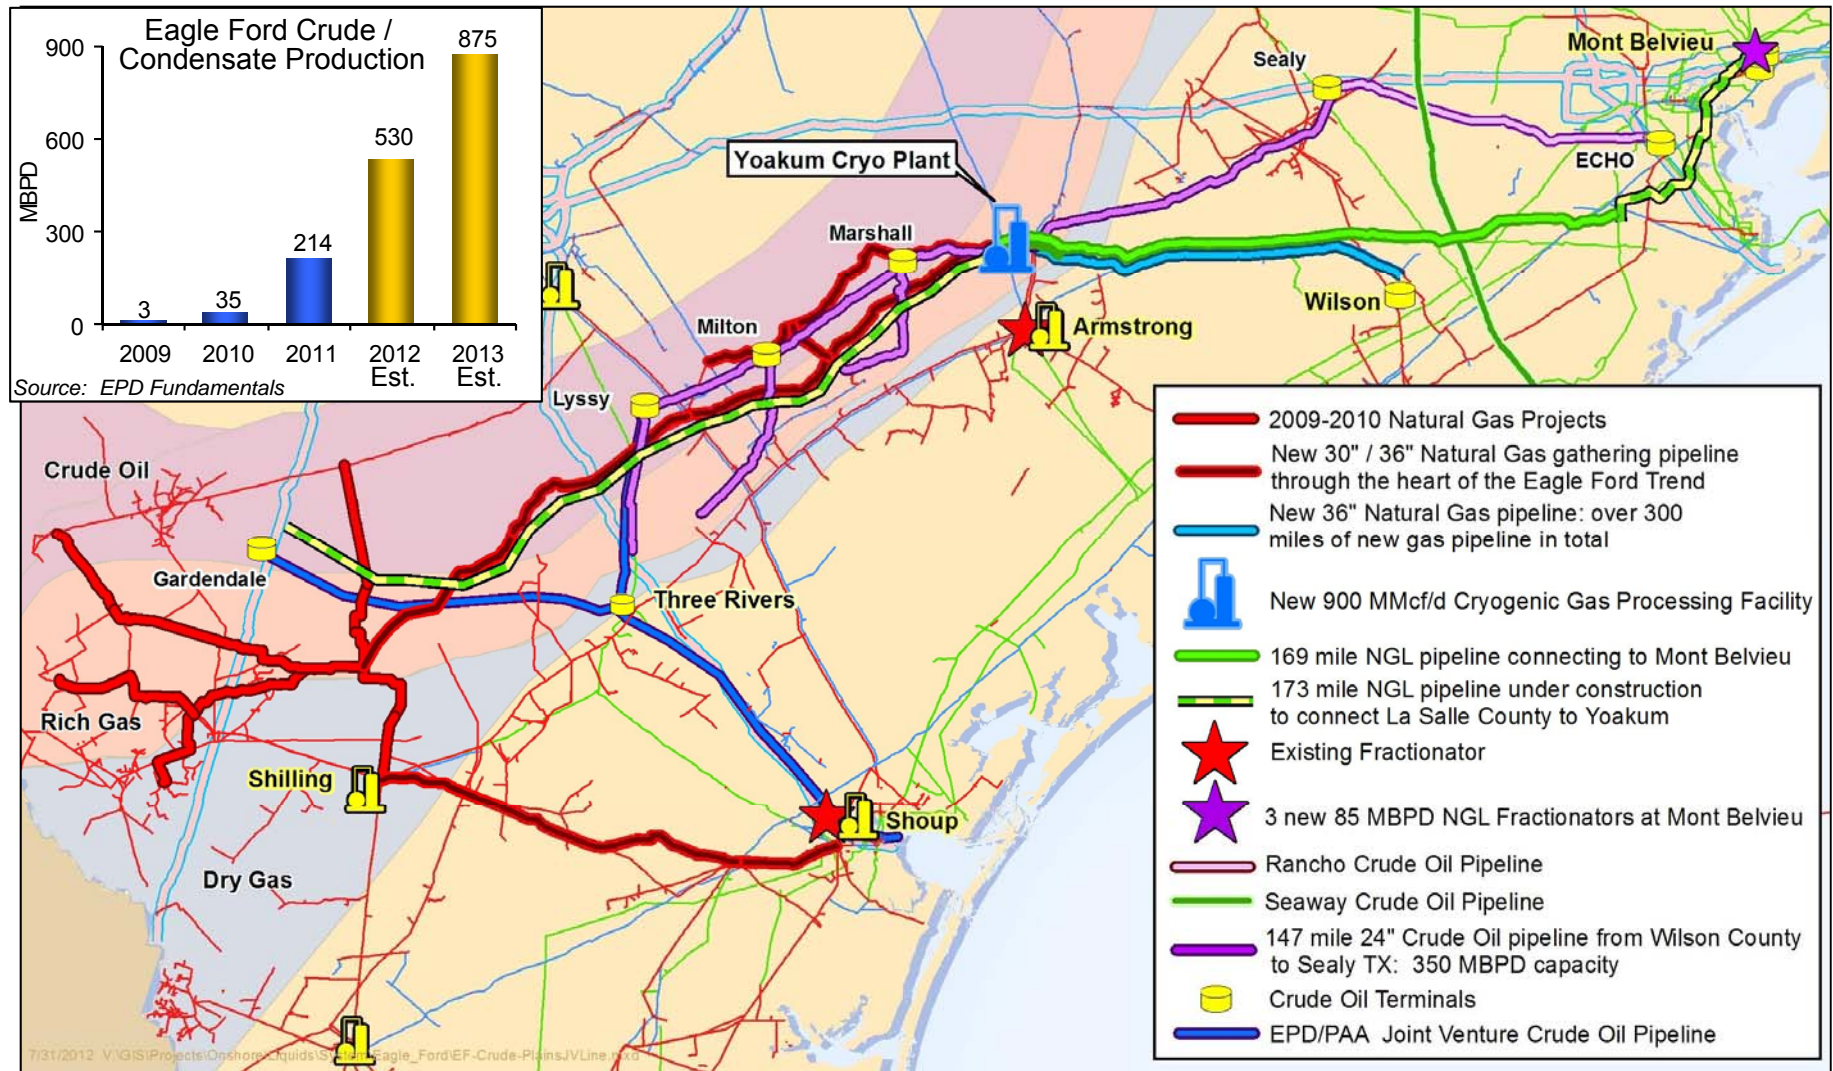

● Front Range NGL Pipeline

- JV between EPD, APC and DCP – 1/3 each
- EPD to construct / operate 435 miles of 12" / 16" pipe from DJ Basin to MAPL and Texas Express pipeline
- 10-year, ship-or-pay agreements
- Capacity of 150 MBPD, expandable to 230 MBPD; expected in-service: 4Q 2013

EPD's Eagle Ford Shale Projects

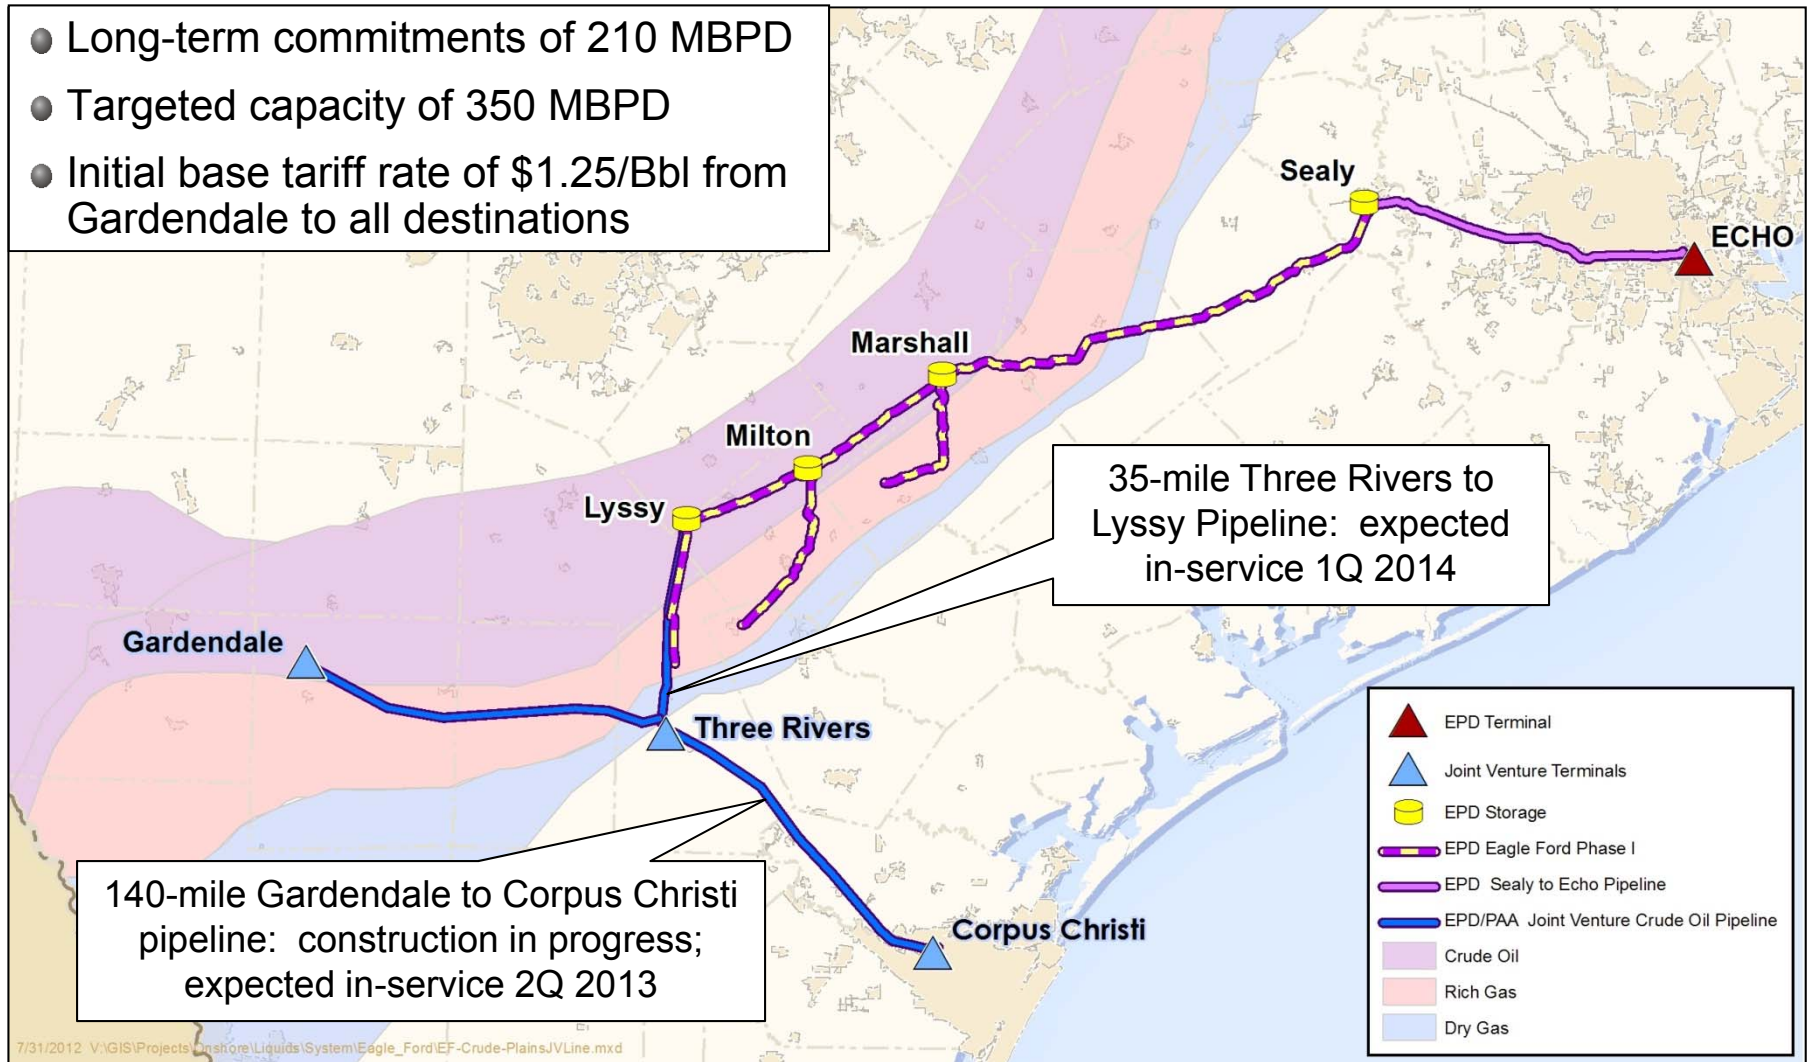

Cumulative Capital Expenditures ≈\$4 Billion

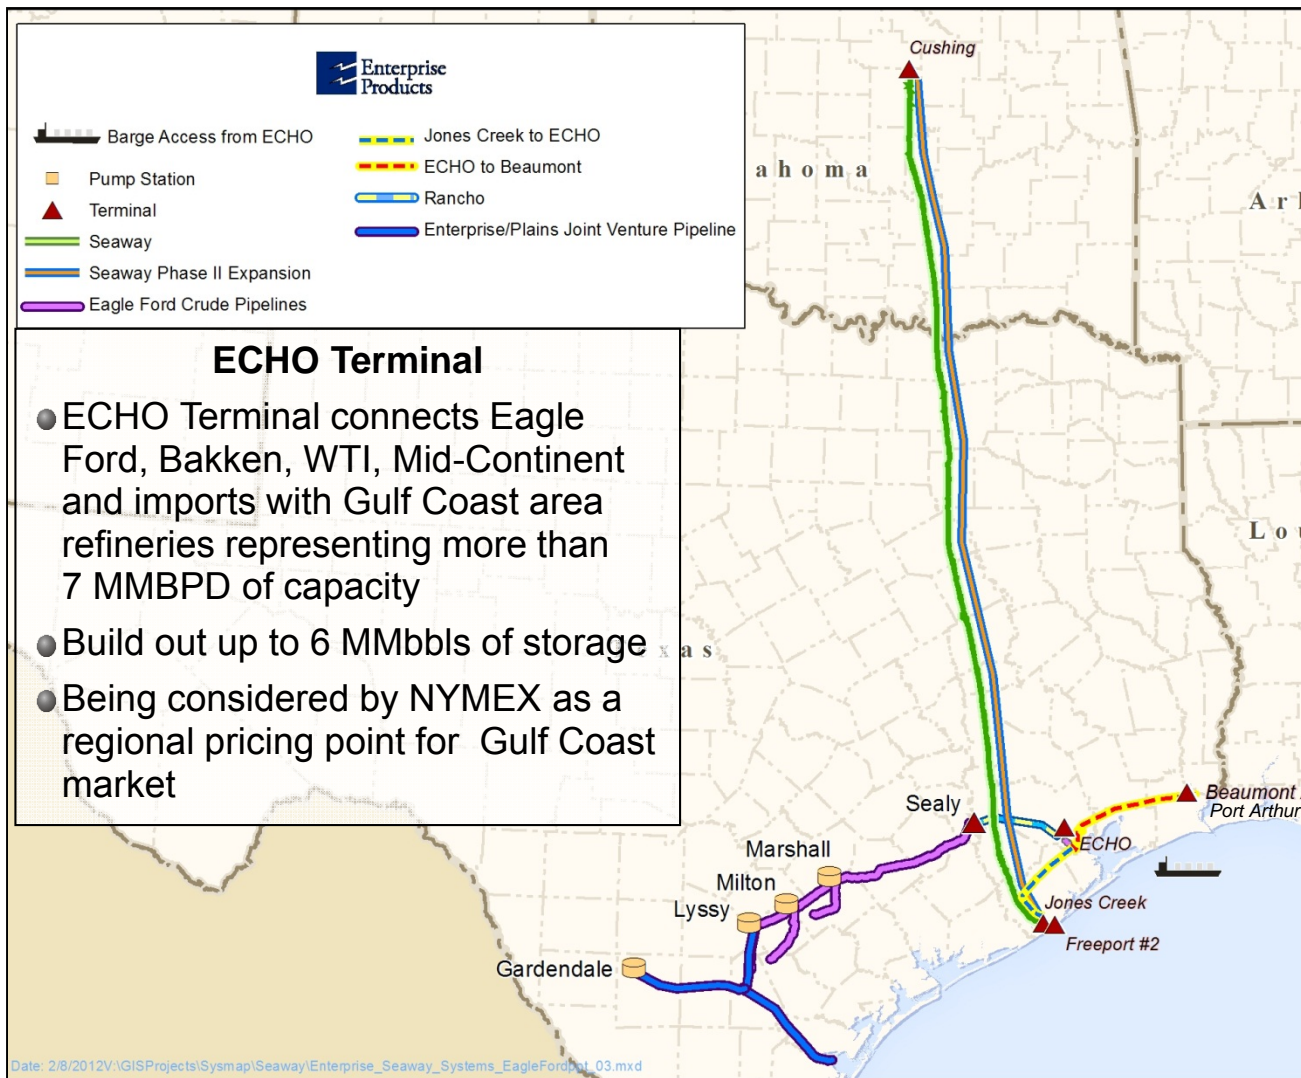

EPD 50% / PAA 50% Crude Oil Pipeline Joint Venture

- Long-term commitments of 210 MBPD
- Targeted capacity of 350 MBPD
- Initial base tariff rate of \$1.25/Bbl from Gardendale to all destinations

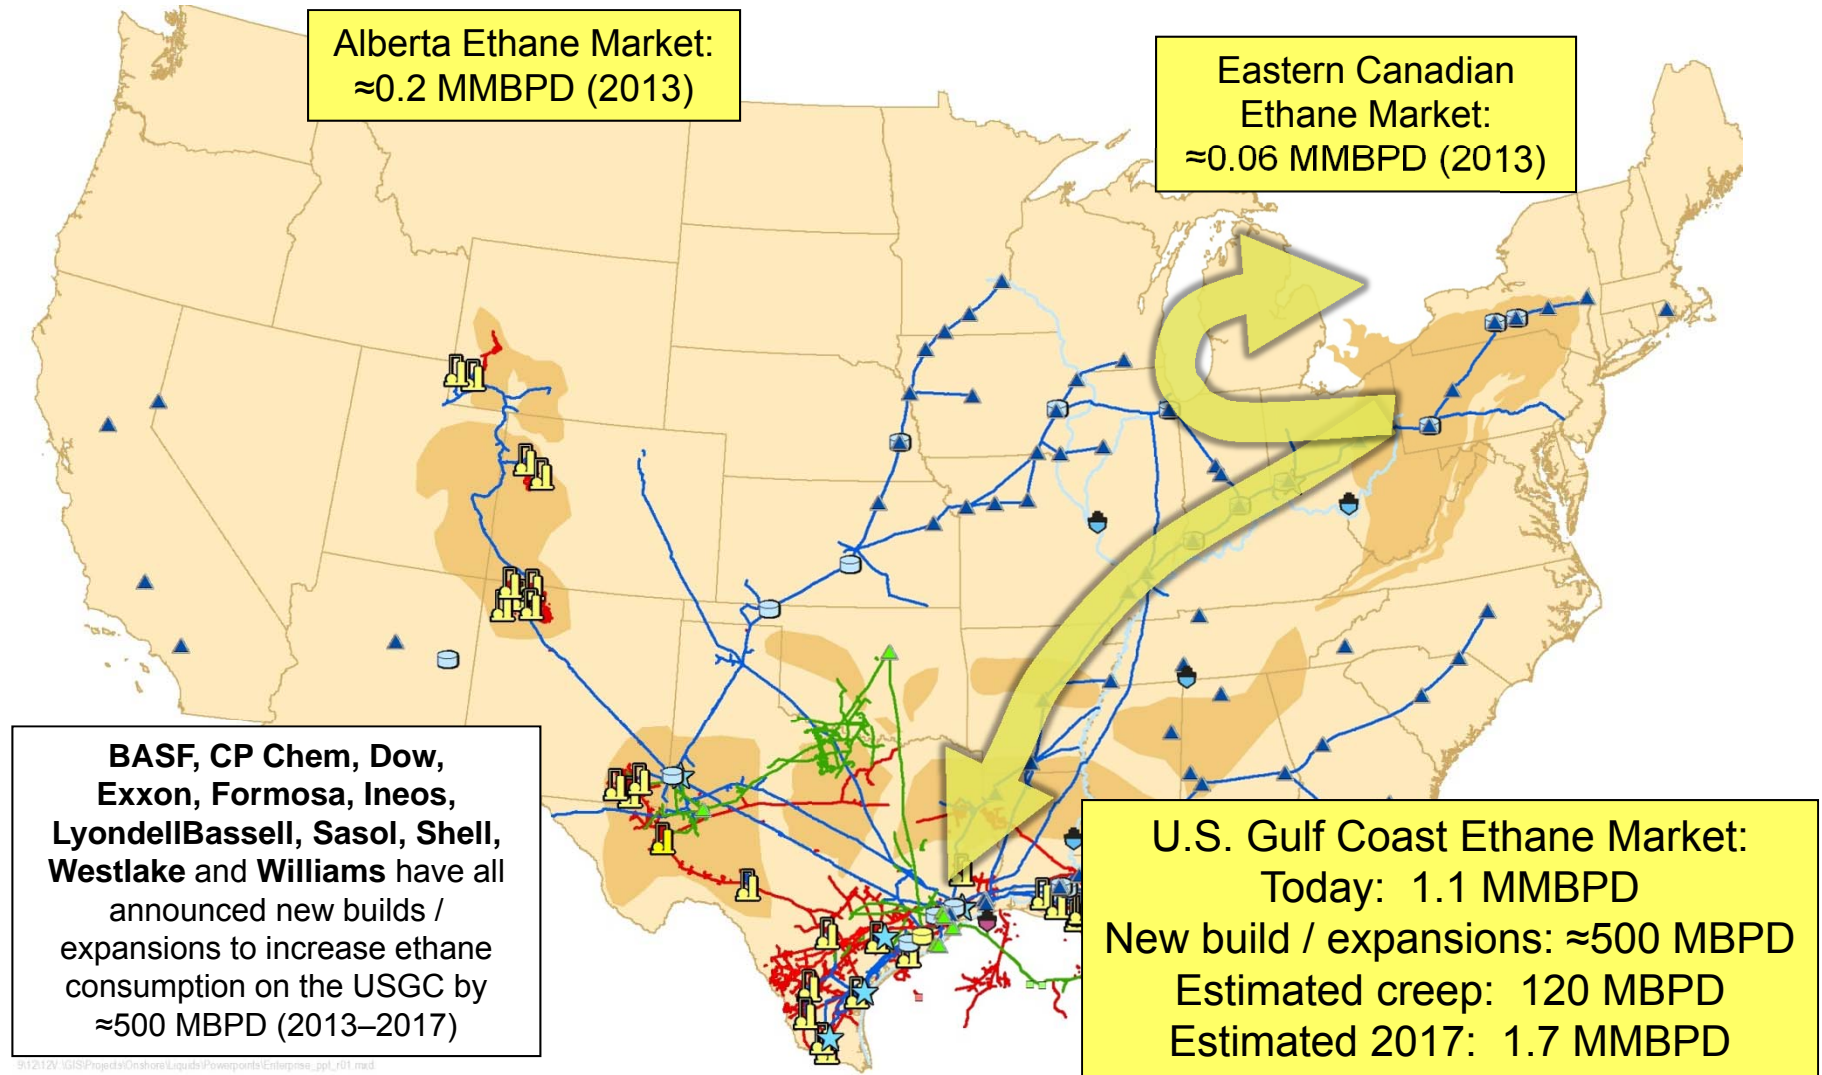

Seaway Crude Oil Pipeline Relieves Cushing Bottleneck

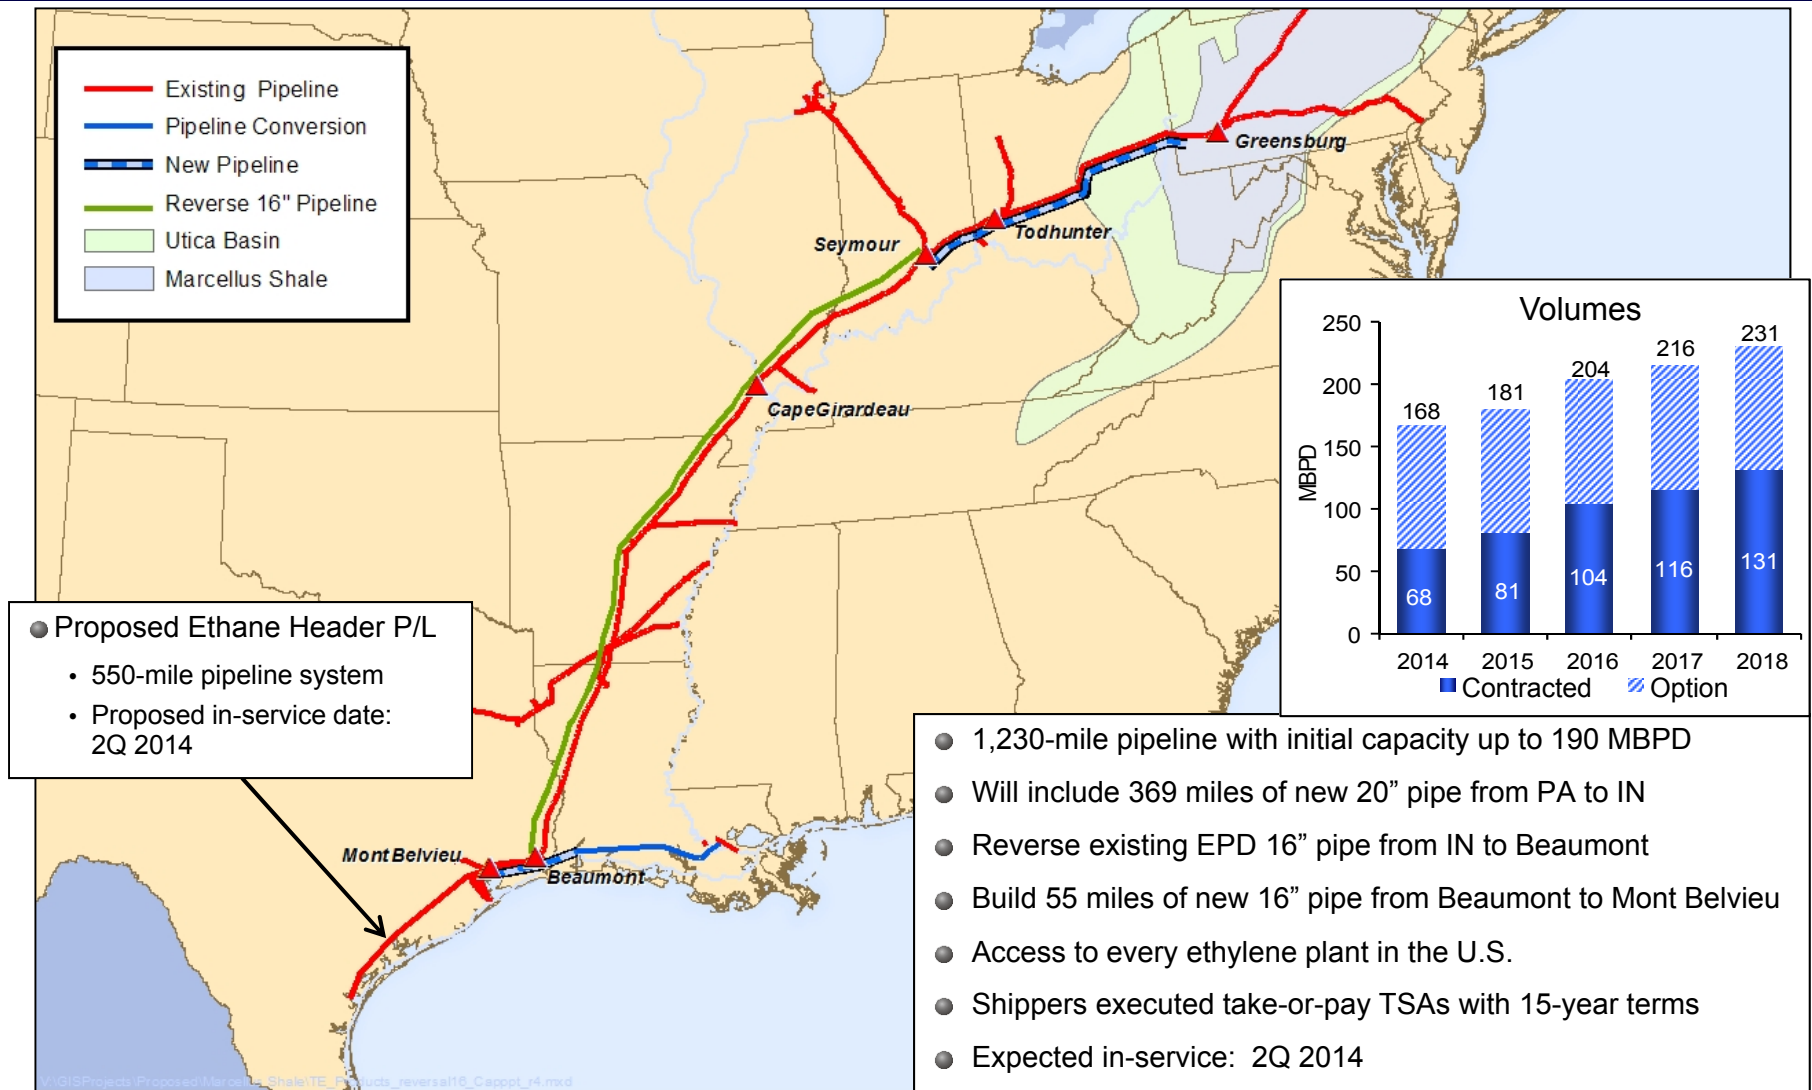

- Joint Venture reversed flow of Seaway and plans to expand capacity to provide Gulf Coast access for Mid-Continent, Bakken and Canadian crude oil
 - Pipeline began moving crude oil from Cushing to Freeport in 2Q 2012
 - Modifying to flow at full capacity by 1Q 2013
 - Building 512-mile, 30-inch parallel pipeline along Seaway to expand capacity to 850 MBPD of mixed light / heavy crude oil service in 1Q 2014
- Supported by commitments of up to 20 years

Note: Assumes ethylene crackers operate at 93% capacity. Annual creep forecasted to only occur from 2014-2016.

Increased Ethane Usage Reduces U.S. Propylene Supply

- Demand for ethane continues to increase vs. naphtha as ethylene crackers favor NGL feedstocks vs. crude oil derivatives
- Shift to higher margin ethane cracking has significantly reduced propylene production from U.S. crackers by 5.8 billion lbs. (38%) since 2006
- U.S. propylene demand remains steady at \approx 33 billion lbs. per year
- Incremental production from Propane Dehydrogenation (PDH) technologies are required to balance U.S. propylene supply and demand
- Today, PDH produced propylene represents only \approx 4.6% of supply
- Expected to increase 9.6% by 2016

Propane Dehydrogenation Plant (PDH)

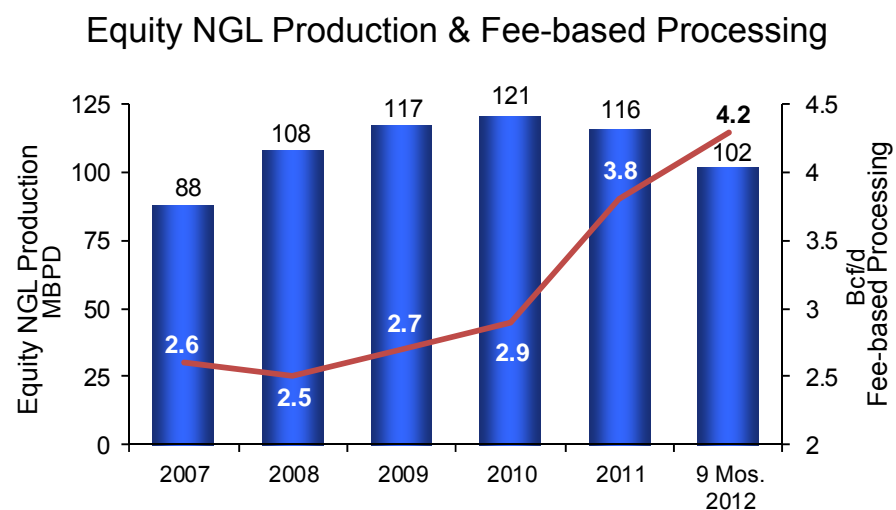

- EPD announced plans to build one of the world's largest PDH units along the Texas Gulf Coast
- Will consume up to 35 MBPD of propane to produce up to 1.65 billion lbs. per year (25 MBPD) of polymer grade propylene
- Will integrate with EPD's existing NGL and propylene fractionation / splitter facilities to provide operational reliability and flexibility
- Supported by 10–15 year fee-based contracts with investment grade companies
 - No commodity risk
 - ≈75% of capacity currently subscribed
- Expected to begin commercial operations in 3rd quarter 2015

...Drives Strong Financial Results

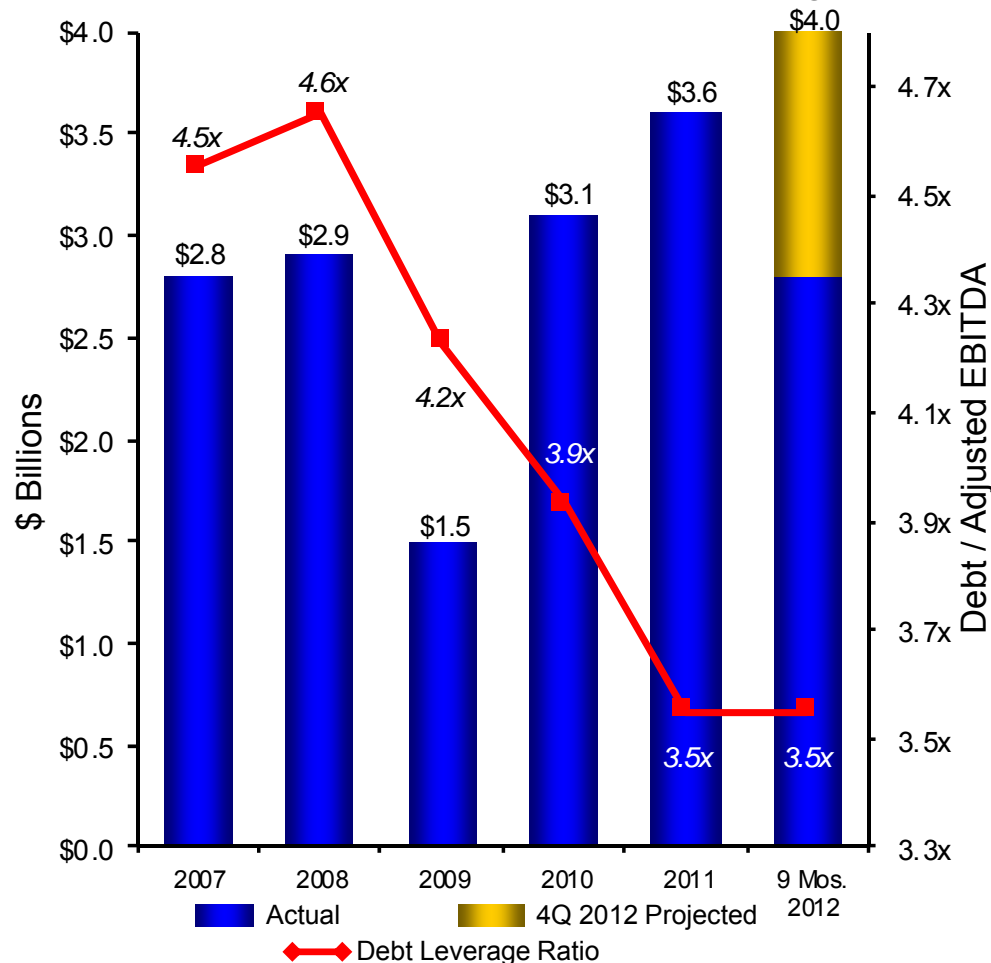

⁽¹⁾ Retained DCF represents the amount of distributable cash flow for each period that was retained by the general partner for reinvestment in capital projects and other reasons.

⁽²⁾ Each period noted includes non-recurring transactions (e.g., proceeds from asset sales and property damage insurance claims and payments to settle interest rate hedges).

History of Financial Discipline While Executing Growth Strategy

Total Growth Capex⁽¹⁾ & Debt Leverage⁽²⁾

- ≈\$5.1 billion of capital growth projects were completed on-time and ≈7% under budget since 2009
- Funded growth investments through issuance of debt and equity, retained DCF and proceeds from asset sales
- Sold \$2.2 billion low-return, non-core assets in 2011 / 2012; potential incremental DCF from redeployment assuming:
 - 15.0% ROR ≈\$170 million
 - 12.5% ROR ≈\$120 million

⁽¹⁾ Represents cash used in investing activities as presented on our Statements of Consolidated Cash Flows before changes in restricted cash, proceeds from asset sales and related transactions, and sustaining capital expenditures.

⁽²⁾ Coverage ratio reflects total debt adjusted for the average 50% equity credit that the rating agencies ascribe to the Junior Subordinated Notes.

Non-GAAP Reconciliations

Gross Operating Margin

We evaluate segment performance based on the non-GAAP financial measure of gross operating margin. Gross operating margin (either in total or by individual segment) is an important performance measure of the core profitability of our operations. This measure forms the basis of our internal financial reporting and is used by our management in deciding how to allocate capital resources among business segments. The following table reconciles non-GAAP gross operating margin to operating income, which is the most directly comparable GAAP financial measure to gross operating margin (dollars in millions):

Adjusted EBITDA

Adjusted EBITDA is commonly used as a supplemental financial measure by our management and external users of our financial statements, such as investors, commercial banks, research analysts and ratings agencies to assess: (1) the financial performance of our assets without regard to financing methods, capital structures or historical cost basis; (2) the ability of our assets to generate cash sufficient to pay interest and support our indebtedness; and (3) the viability of projects and the overall rates of return on alternative investment opportunities. Since adjusted EBITDA excludes some, but not all, items that affect net income or loss and because these measures may vary among other companies, the adjusted EBITDA data included in this presentation may not be comparable to similarly titled measures of other companies. The following table reconciles non-GAAP adjusted EBITDA to net cash flows provided by operating activities, which is the most directly comparable GAAP financial measure to adjusted EBITDA (dollars in millions):

Distributable Cash Flow

Distributable cash flow is an important non-GAAP financial measure for our limited partners since it serves as an indicator of our success in providing a cash return on investment. Specifically, this financial measure indicates to investors whether or not we are generating cash flow at a level that can support our quarterly cash distributions. Distributable cash flow is also a quantitative standard used by the investment community with respect to publicly traded partnerships because the value of a partnership unit is, in part, measured by its yield, which is based on the amount of cash distributions a partnership can pay to its unitholders. The following table reconciles non-GAAP Distributable Cash Flow to net cash flows provided by operating activities, which is the most directly comparable GAAP financial measure to distributable cash flow (dollars in millions):
