PetroWire

Opportunity is a reflection of information.

A Unique Tool To Track Oil & Gas Activity

PetroWire is an advanced project-tracking database, developed in conjunction with a major oil & gas company, that monitors activity across the global oil and gas value chain.

This unique tool delivers market intelligence on any prospect, property, play, platform, pipeline or industry project through customized real-time informative alerts and data sheets.

PetroWire covers international, Gulf of Mexico and oil sands activity and will soon include a US onshore module. PLS is also georeferencing more than 52,000 Activity Datasheets for release in 2016.

– Turning news into intelligence.

Activity Datasheets

Information Abstracts are compiled in Activity Datasheets with maps and general information with historical archives dating back to 1998.

Information Abstracts

Industry activity, reports and IR materials are exhaustively processed by PLS analysts who identify incremental information and author short, tightly focused Abstracts.

Georeferenced & Indexed

All Abstracts and Activity Datasheets are georeferenced and tagged. A wealth of industry data can easily be accessed through the PetroWire map view.

Activity Datasheet (Nigeria)

OML 113

Province: Benin Basin

Type: Permit

Description: 1820km² block including Aje oil, gas & condensate discovery. Block was granted for 20 year term in Jun 1998.

Location: Nigeria, Benin Basin, near border with Benin

Thematics: FPSO-FSO, Offshore, Offshore-Deep

Operator: Yinka Fawaleyi (Lundin Tech Adv)

Partners: FHN (Afren) 16.7%, Lundin 22.5%, Yinka Fawaleyi Energy (80%), Vitol Exploration 4%, Jacka Resources 2.8%, Panoro Energy (Pan P), MX Oil 5%, Chevron
