

# PetroWire

Powered by PLS Inc.

## Continuous monitoring of worldwide oil & gas activity

PetroWire analyzes information accumulated from over 1,200+ industry sources.

## Timely

PLS processes information within 24-48 hours.

## Reliable

PetroWire has continuously tracked O&G activity since 1998, rationalizing a growing mass of company information and published reports.

## Exhaustive

Documents & press reports are analyzed in entirety with no editorial bias. PetroWire provides unparalleled breadth and depth of coverage on worldwide O&G activity.

## Fact-based, Event-focused

Information is broken down into concise abstracts categorized by type of event (permit award, plan to drill, discovery, plan to build, etc.).

## Customizable

Clients can filter abstracts to personalized criteria (including by project, country, company, topic, keyword, time, etc.) and build customized reports that can be delivered at a time and in a format of their choice.

## Archived

The information abstracts produced since 1998 show valuable project history and progression, organized in a relational web database.

## Web-based

The information can be accessed and retrieved from any web browser connected to the internet.

PetroWire is an advanced project-tracking database, developed in conjunction with the industry to monitor activity across the global oil and gas value chain.

This essential tool delivers market intelligence on any prospect, property, play, platform, pipeline or industry project through customized real-time informative Alerts and Activity Datasheets.

## PetroWire provides a simple way to track worldwide market activity and global oil & gas projects.

PetroWire is the perfect tool for the busy energy executive looking for insight on their specific area of responsibility whether tracking a company, country or industry project. The combination 'Alerts' and 'Activity Datasheets' provide a highly condensed, continuously updated and entirely customizable feed consumable in a variety of formats from your phone to your desktop and from email to pdfs.

- All industry activity is aggregated, tagged and recorded in the database
- Users can set up their own reports and alerts or use the unique map interface to drill down
- Activity Datasheets offer solid historical information on various projects, prospects and permits

### Alerts & Abstracts

Industry activity, reports and IR materials are exhaustively processed by PLS analysts who identify incremental information and author short, tightly focused Abstracts.

### Activity Data Sheets

Information abstracts are compiled in Activity Data Sheets with maps, general information and historical archives dating back to 1998. These can be exported as PDFs and shared with colleagues.

### Custom Reports

Clients can filter the abstracts to their criteria, customizing reports that can be exported as a PDF. Regular reports can also be received hourly, daily or weekly as mobile-friendly email alerts.
